

How to Download the MyHolsync App

CENTERPOINTE
RESEARCH INSTITUTE

www.MyHolosync.app

CRITICAL DETAIL!

Before we get started, it's important to note that you will need to use this QR Code or the link to download the app because it contains special invite information that connects the app with the Holosync content.

www.MyHolosync.app

If you were to just search for Learnistic (our app testing platform) in the app store, sure you would find it, but you won't get access to the MyHolosync content.

You must use the QR Code or the link for it to work.

Now, let's get started!

Step 1: Use the QR Code or Type in www.myholosync.app

If you're reading these instructions on your computer and have access to your phone then follow these instructions.

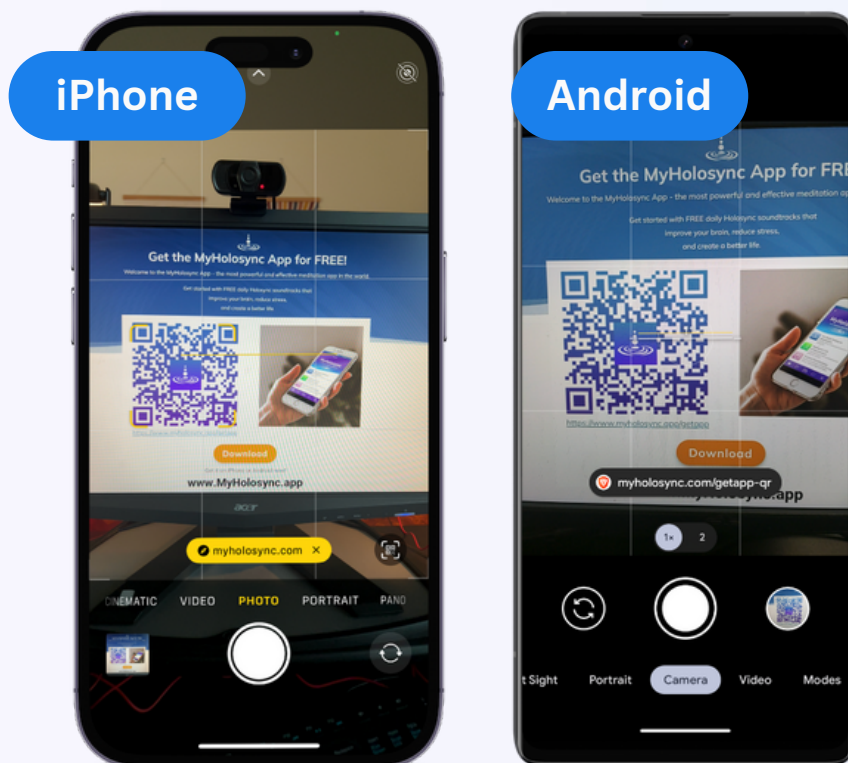

Here we have a QR code which you can use to pull up the Learnistic app in the Apple App store or the Google Play Store.

To use the QR code all you need to do is to open your camera app like you're going to take a picture. Then place the QR code in the middle of the screen. Your phone should automatically recognize the QR code and display a link. Now tap that link.

This is what it looks like on iPhone and Android.

www.MyHolosync.app

Step 1: Use the QR Code or Type in www.myholosync.app

Now, if you're reading these instructions on your phone or the QR Code didn't work for you, then you will need to do this a different way...

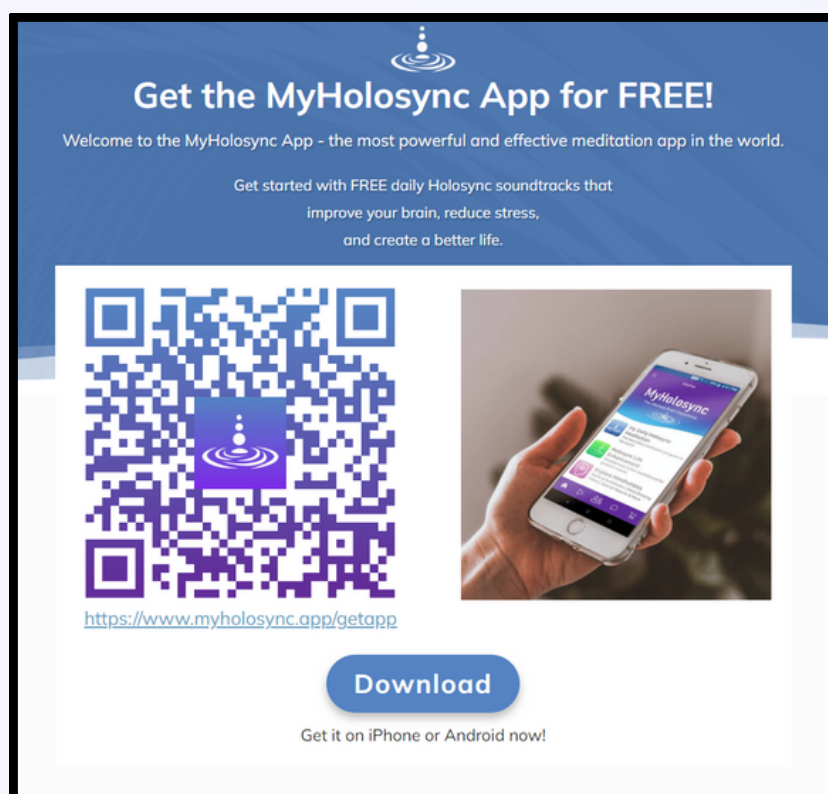

Open a browser on your phone and type in the following URL:

www.myholosync.app

Once you type that in and hit enter, you'll be taken to a page like this that has a QR code and download button in the middle of the screen.

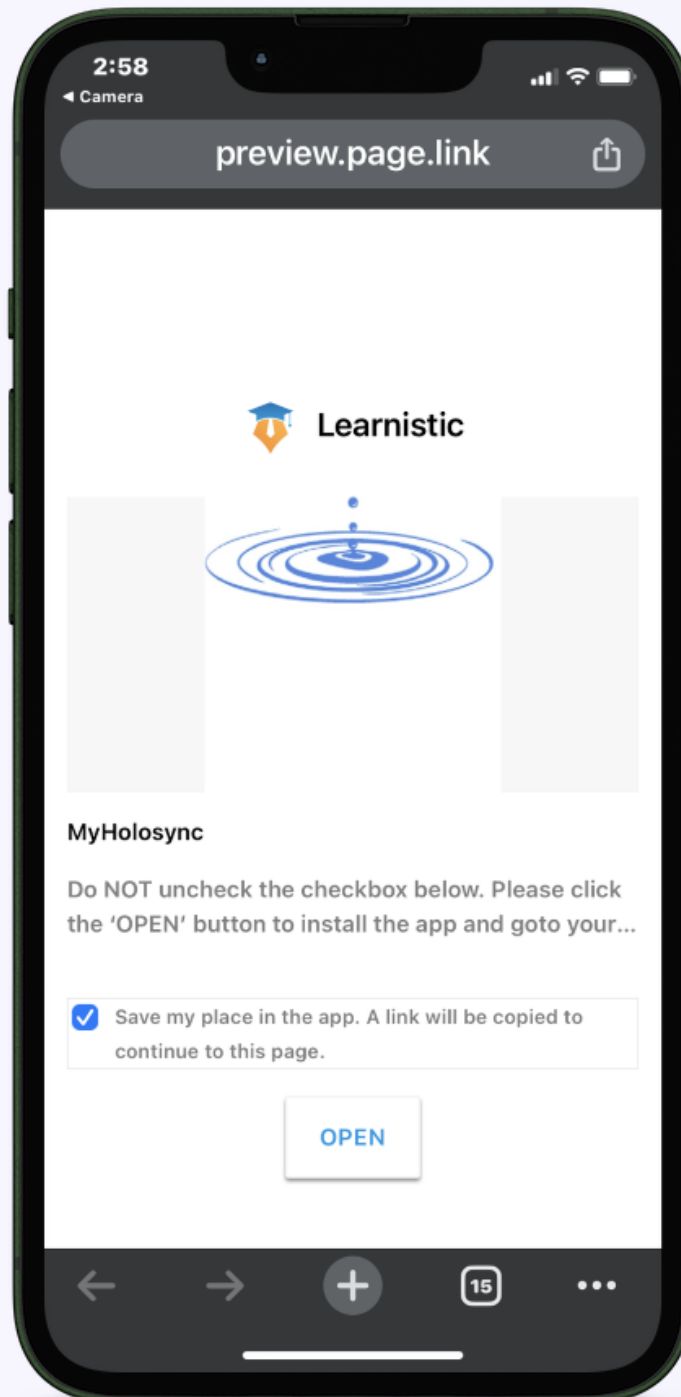

Now simply tap the download button to be automatically taken to the app download page in the Apple App Store or Google Play Store depending on your device.

This is what the www.MyHolosync.app website looks like:

Note: If you are using an iPhone, you will see this open confirmation screen.

Simply tap the open button to continue.

Step 2: Download the App

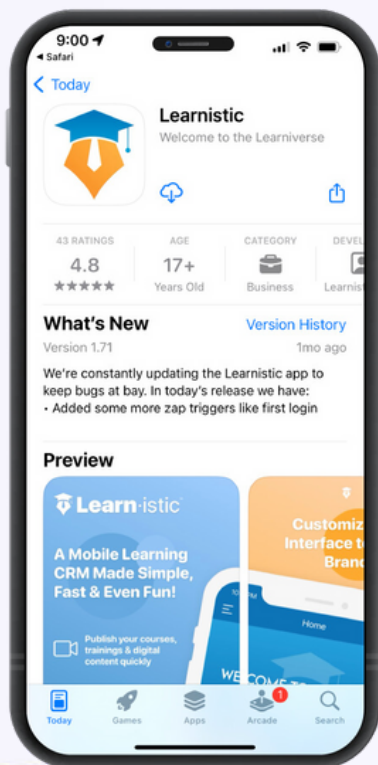

Now you should be seeing something like this.

On an iPhone you'll tap on the **Get** button to download and install the Learnistic app.

On an Android phone you'll tap the **Install** button to download and install the Learnistic app.

Depending on your internet connection speed it may take a few moments.

iPhone

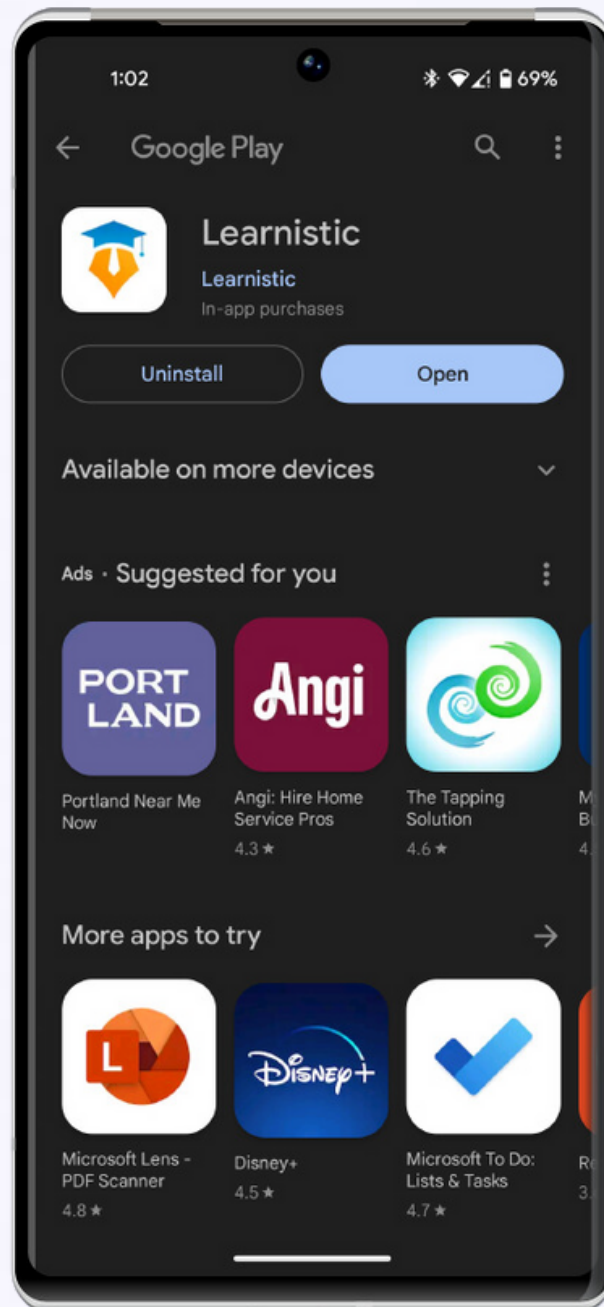

Android

Step 3: Open the App for the first time

Once the app has been installed, you may need to tap the open button, to open the app.

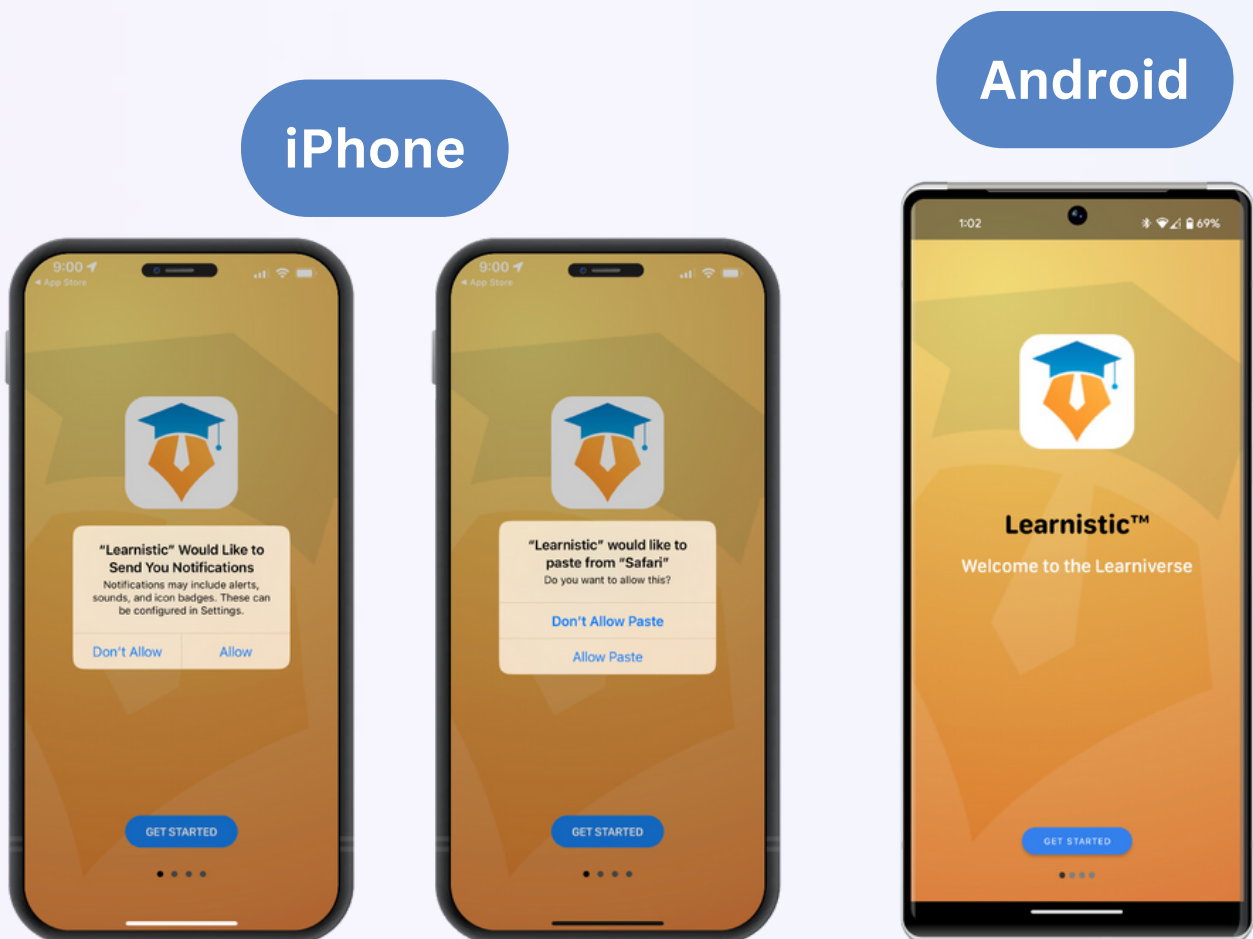

Step 3: Open the App for the first time

When you open the Learnistic app for the first time, it may prompt you with a couple of questions.

You will need to “allow paste” to continue the installation process.

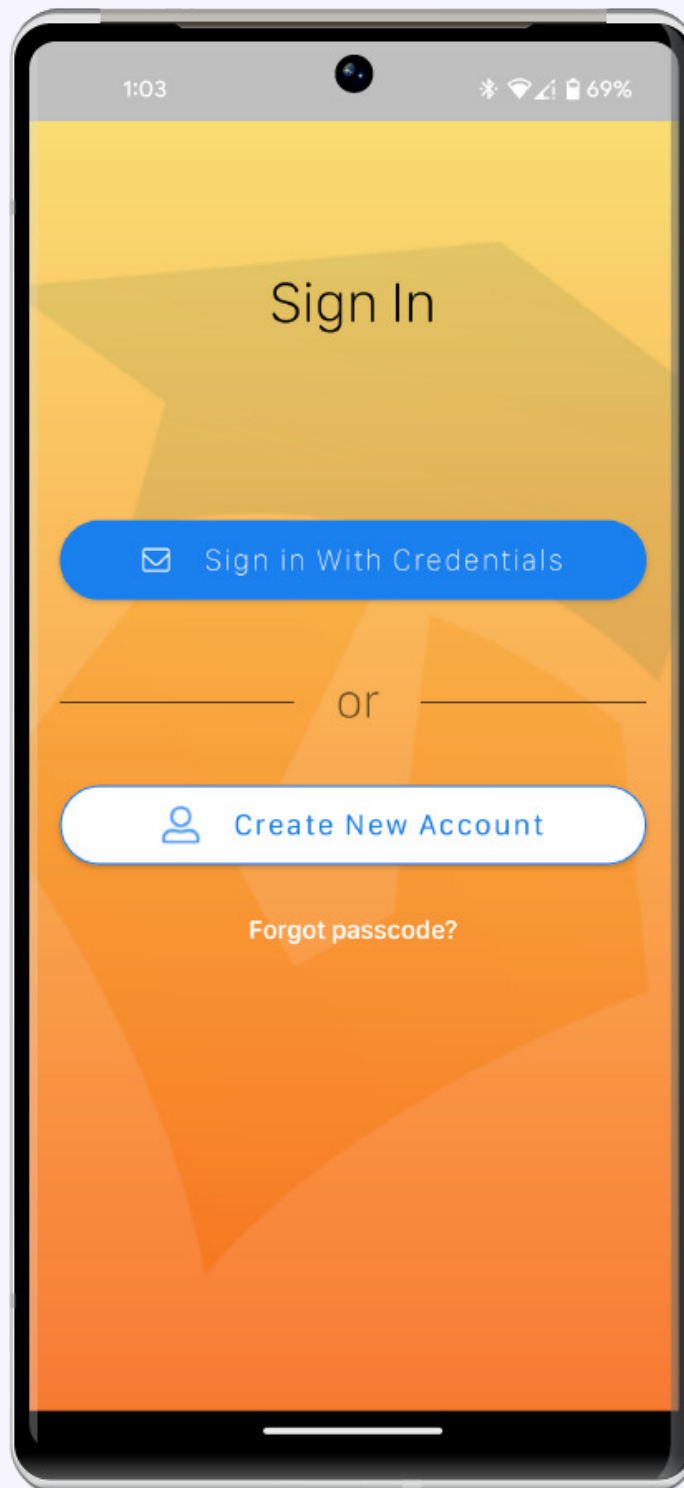

You can choose the option you prefer for notifications.

Next tap the **Get Started** button to continue.

Step 3: Open the App for the first time

This will take you to the sign-in screen, where you will be tapping on the “Create New Account” button.

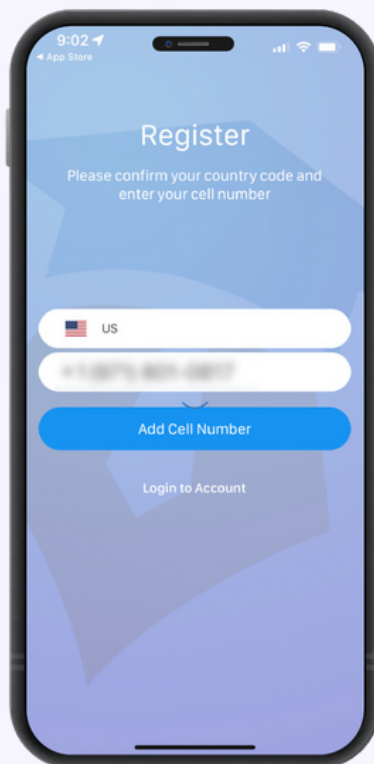

Step 4: Create your account

The first step of creating your account is to enter your phone number.

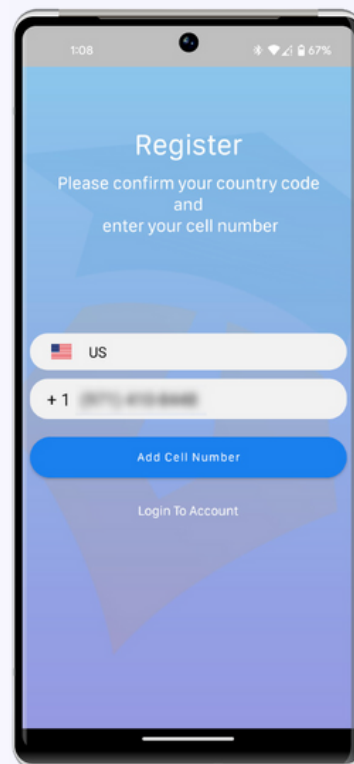

It's important that you use a phone number that can receive SMS messages, also known as “text messages,” because you'll be receiving a temporary code to set up your account.

Enter your phone and tap the Add button.

iPhone

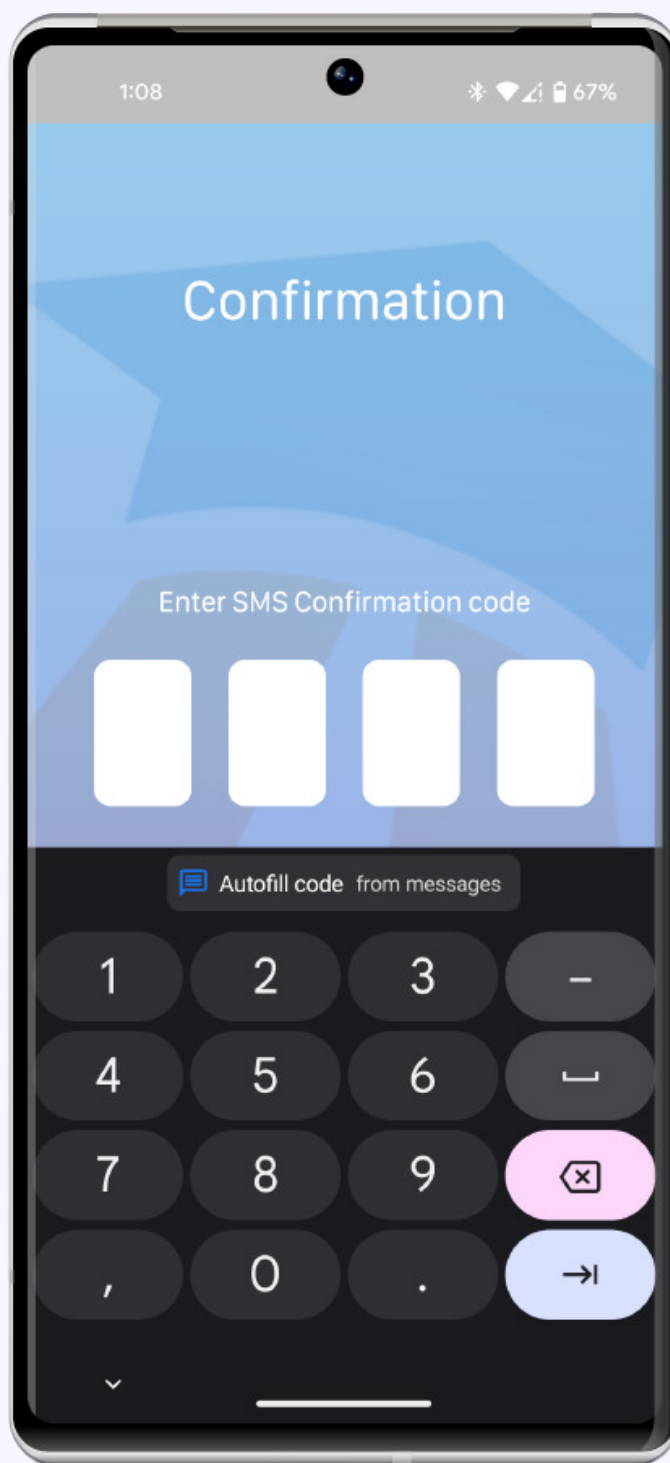

Android

Step 4: Create your account

And on the next screen the app is asking for that confirmation code.

Step 4: Create your account

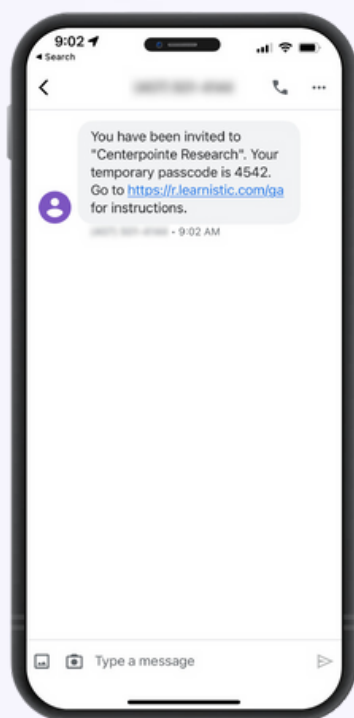

Within a few minutes you'll receive a text with a four digit confirmation code.

You can see examples below.

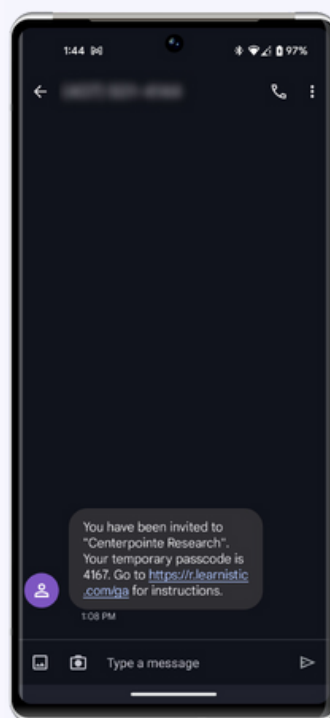

Be aware that your code will be unique to you and your account.

And it may take several minutes for it to arrive. Please be patient.

iPhone

Android

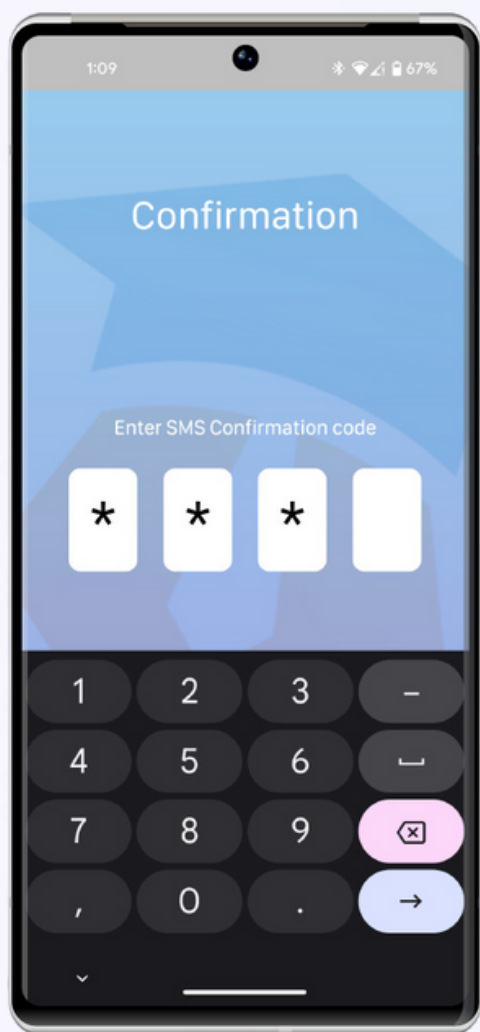

Step 4: Create your account

Once you receive your code just type it into the app.

Be careful to enter the code correctly the first time.

If you make a mistake you will need to go through the passcode reset process.

Step 5: Recovery Email & Passcode

[SEQUENCE MAY VARY!]

The next items that the app is going to ask you for is a recovery email and a passcode.

The sequence will vary depending on what type of phone you are using.

We'll talk about the recovery email now and the passcode next, but you may see it the other way around.

[SEQUENCE MAY VARY!]

Step 5: Recovery Email & Passcode

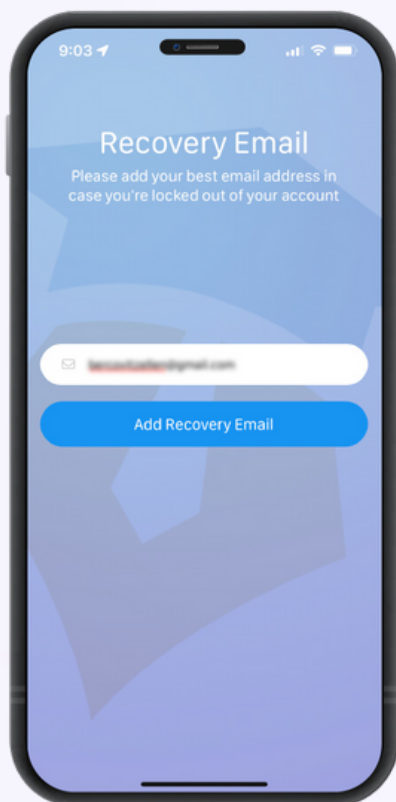

Let's talk about the recovery email.

Be sure the email address you use as your recovery email matches the email address you use with Centerpointe.

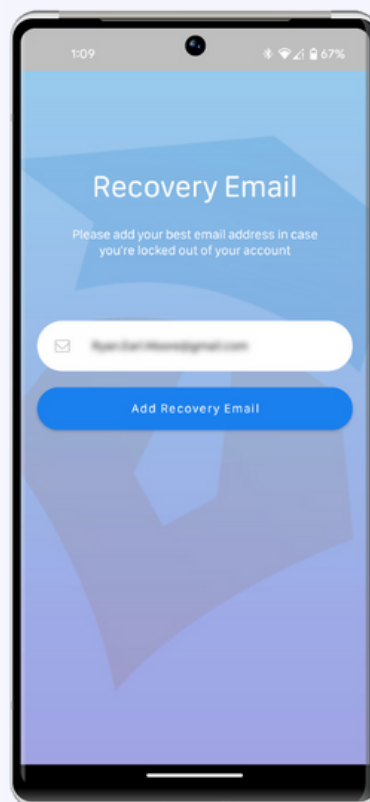

This will allow the app software and your Holosync account to work together.

Once you have typed in your email address, please make sure that it is free from any errors or typos **BEFORE** tapping the add button.

iPhone

Android

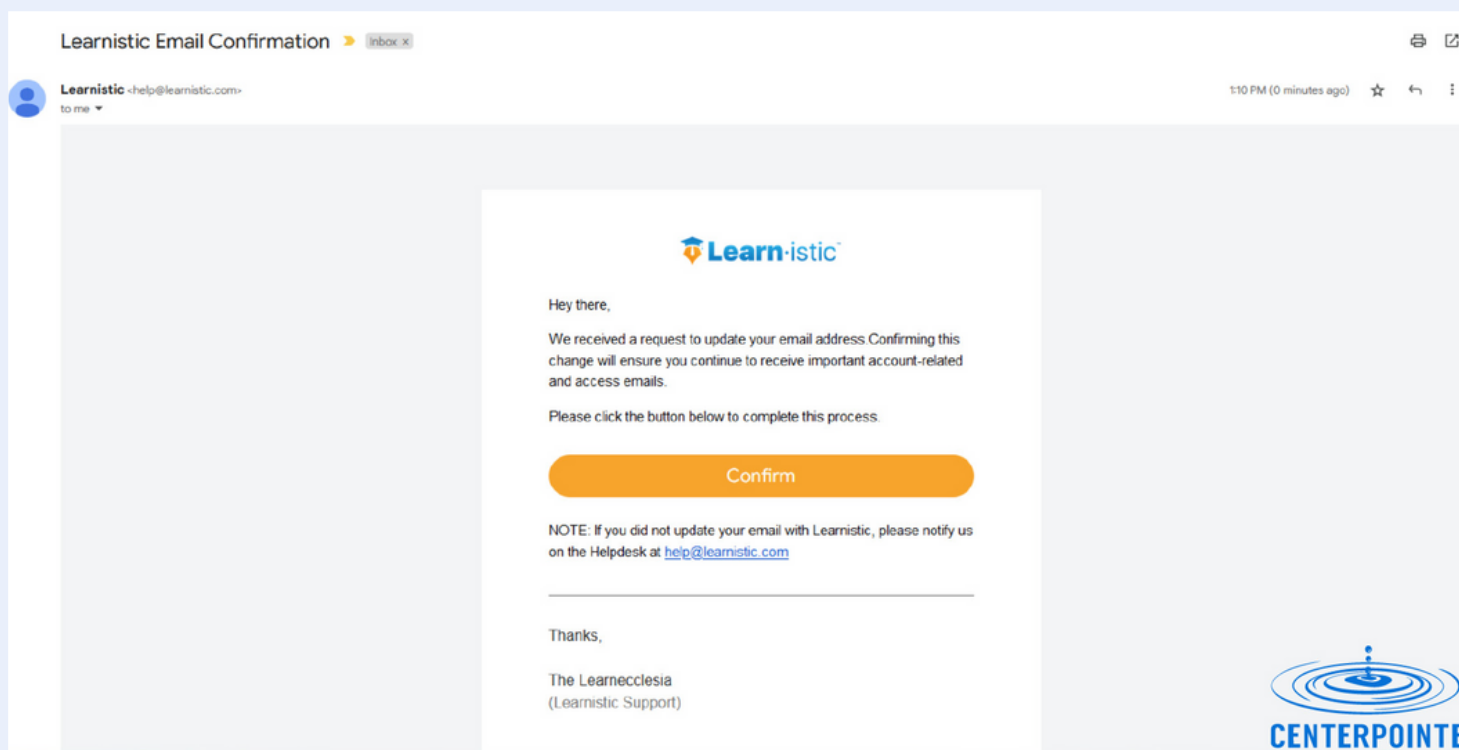

Step 5: Recovery Email & Passcode

You will receive an email to confirm that your address is correct, which makes it easier for you to reset your access if you run into any issues.

When you get the email, simply click the confirm button.

Be aware that this email will be sent from Learnistic, not Centerpointe, so you may need to check your spam folder.

Step 5: Recovery Email & Passcode

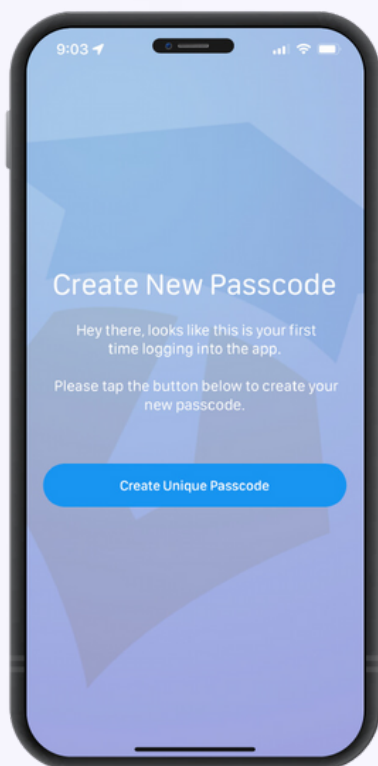

Now let's talk about the Passcode.

You might see a “create unique passcode” button. If you do, tap on it and you'll be taken to a screen that allows you to type in a four-digit passcode. Or you might just be taken directly to this page.

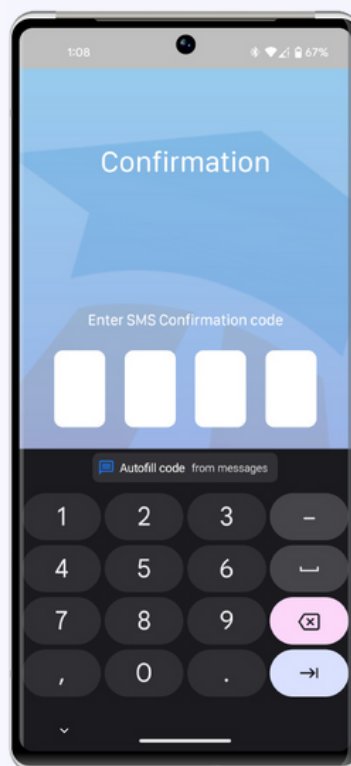

Create a passcode that you will remember since it will be used like a password to sign into the app.

Go ahead and enter a passcode.

iPhone

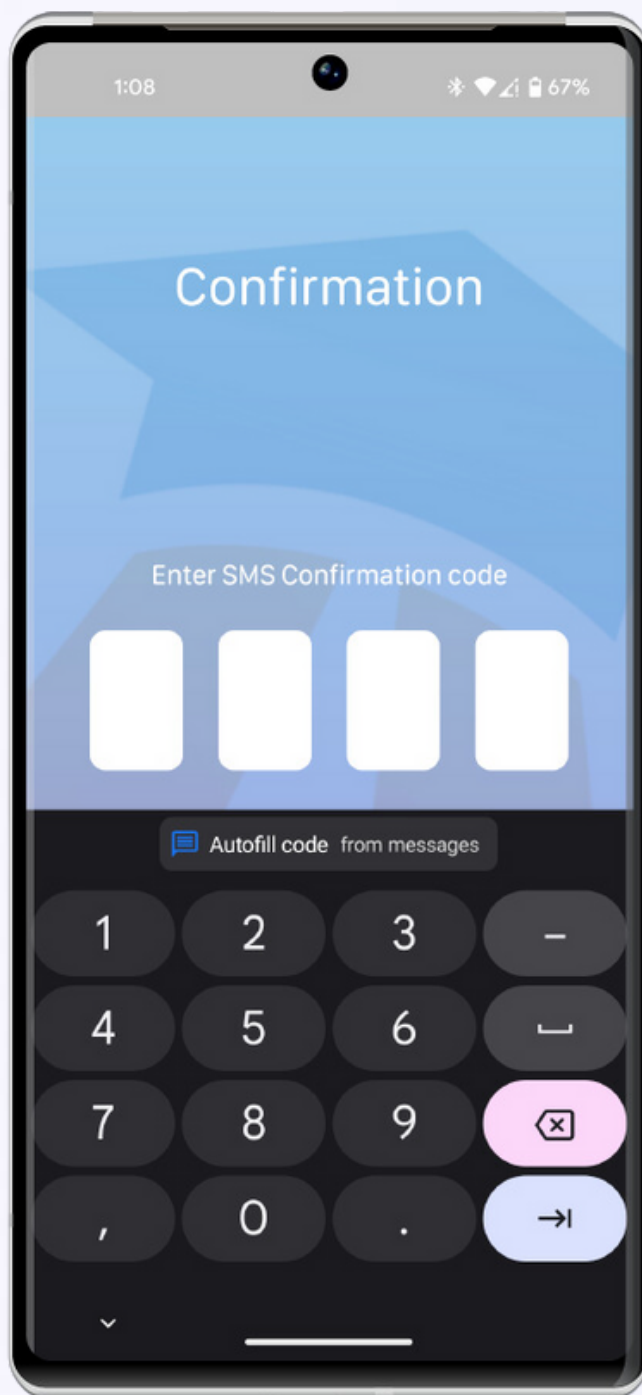

Android

Step 5: Recovery Email & Passcode

Once you've entered it, the next screen is going to ask you to confirm your passcode by typing it in again. Do so, now.

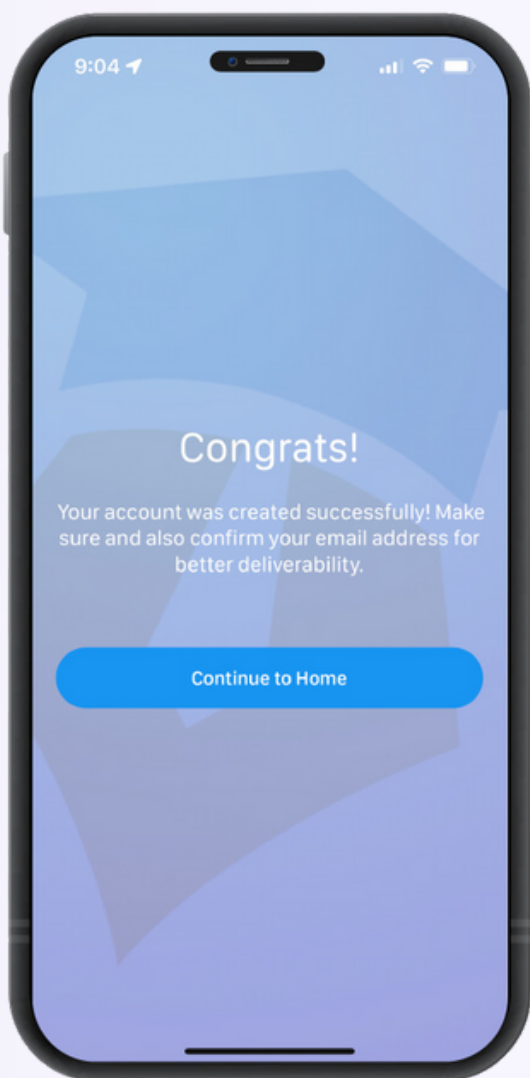

Step 5: Recovery Email & Passcode

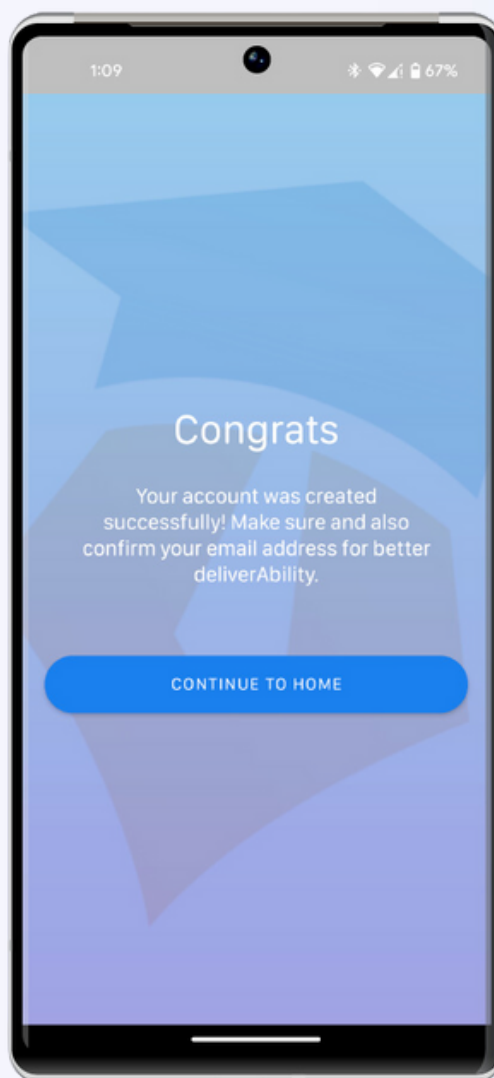

And that's it! You're done. You've created your account!

Now. Simply tap the 'Continue to Home' button to be taken into the app.

iPhone

Android

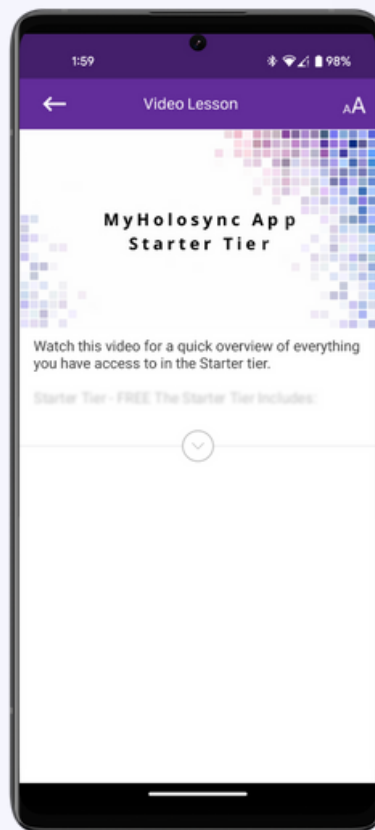

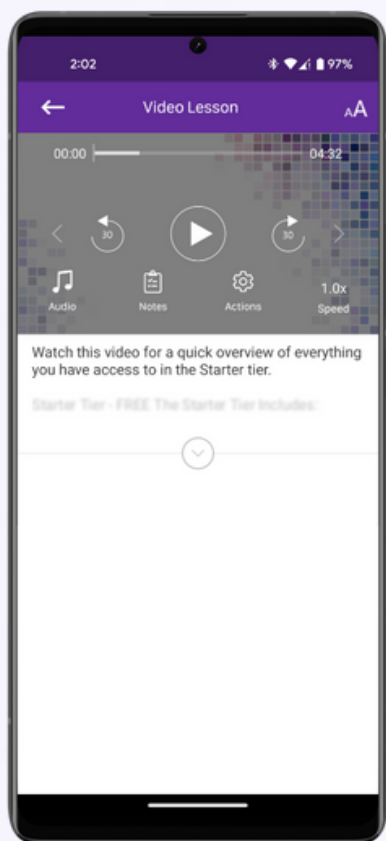

In the App

On your first login, you will be taken to a short video explaining all the content you now have available to you.

We recommend watching this video all the way through.

If you are going to skip the video, be sure to scroll to the end of the video first, since the completion of this video helps your content to load in faster.

Tap the back arrow to go to the home screen.

In the App

If your account is still loading content, your home screen will be missing the My Daily Holosync menu like the screen on the left.

It may take several minutes for our system to completely load the content onto your account. Once it finishes, it will look like the screen on the right.

Feel free to explore everything the app has to offer you.

Thanks for following along! We know you're going to love all the brain-improving content in the new MyHolosync app.
